Connection performance values pertain to structural capacity.

Keep operational torque jumps under the Yield Torque – not to be rotated at. The operating torque limit applies to the unloaded case – torque-tension plots are available on request.

Anyone who uses this material does so at their own right and assumes any and all liability resulting from such use.

*Collapse value shown is the calculated API collapse and not the specific high collapse value. The actual collapse rating is 100% of pipe body and will vary depending on the mill. Verify the collapse rating of the pipe body with the manufacturer.
